## Specification

|                                                   |                                                                  |
|---------------------------------------------------|------------------------------------------------------------------|
| Product name: 3-Hydroxy-5,2',3'-trimethoxyflavone |                                                                  |
| Product code: JT1450                              | Chemical Formula: C <sub>18</sub> H <sub>16</sub> O <sub>6</sub> |
| CAS No.: 103395-50-2                              | MW: 312.32                                                       |

| Item            | Specification         |
|-----------------|-----------------------|
| Appearance      | White to brown powder |
| Purity (HPLC)   | >98%                  |
| Identity (HNMR) | Conform to structure  |

**Notes:** Protect from light and moisture air. Store at 2-8°C.
